

Riley Nidositko

Boston, MA 02215 | 339-214-8058 | rnidositko@gmail.com

Portfolio: <https://rileynidositko.github.io/RileyNidositkoPortfolio/>

Education:

Bachelor of Science: Mechanical Engineering, Expected 05/28

Boston University - Boston, MA - 3.58/4.0 GPA, Dean's List (Year 1, semester 2)

Work Experience:

Engineering Product Innovation Center, Boston University, 01/26 - Present

Lab Assistant

- Maintained and troubleshooted 10+ machines including CNC mills/lathes, manual mills/lathes, laser cutters, waterjets, and 3D printers; documented preventative maintenance to minimize downtime.
- Supported students and researchers with CAD/CAM workflow, material selection, and machine setup for prototyping projects within a facility serving 1500+ users per semester.
- Enforced and instructed proper lab and machine safety procedures.

South Shore Pool Supply, 05/25 - 09/25

Maintenance Technician

- Applied technical troubleshooting and critical thinking to diagnose and fix problems.
- Advocated client communication and conflict management to maintain optimal service.
- Organized billing for customers and managed work time autonomously.
- Practiced proper chemical safety to guarantee client and employee protection.

Independent Music Lesson Instructor, 05/24 - 09/24, 05/25 - 09/25

- Networked to clients and developed strong relationships with students and parents.
- Assessed student progress regularly, providing tailored feedback and support.
- Managed multiple age and skill levels from beginner to intermediate.

Featured Projects:

Aerodynamic Radiator Duct Design: *Boston University Formula SAE Electric Team, Terrier Motorsport.*

- Designed and manufactured fiberglass composite ducting using hand layup processes.
- Optimized airflow while reducing component weight by approximately 20%.

PID Control Ball-Balancing Platform: *Independent Project*

- Designed, built and coded a robotic articulating platform that balances a ball using PID control.

Brass Pen: *Independent Project*

- Engineered and machined a unique pen design using CAD software and manual lathe operations.

Skills and Certifications:

Technical: Manual Mill & Lathe, MIG Welding, 3D Printing, Laser Cutting, Soldering, Technical Drawing.

Software: Solidworks, Fusion 360 (CAD & CAM toolpaths), Onshape, FEA, C++, Python, Java, Javascript.

Adult and Pediatric First Aid/CPR/AED certified.

SciSure Safety Trainings: Fire Safety, Laboratory Safety Training, Hazard Communication, Chemical Safety Training, Personal Protective Equipment Fundamentals, Machine Guarding.

Leadership experience:

Aerodynamics and Bodywork Team Lead, 12/25 - Present

Boston University Formula SAE Electric Team, Terrier Motorsport.

- Oversaw the design, construction, and documentation of all aerodynamic devices and bodywork.
- Taught members teamwork and technical skills focusing on composite manufacturing.
- Led assigning work packages and placing orders while upholding healthy communication and working environments for members.

Co-founder and Mentor, *Scituate High School FIRST robotics, Cyber Sailors Team 8626.*

- Facilitated a welcoming learning environment for students.
- Trained students on technical, teamwork, and safety skills.
